Theyarealsowelcometodeveloptheirown,sportsrelated,elective.Ergome In the early recovery phase after ergometric stress testing, complications such as arrhythmia and circulatory collapse can arise, and therefore the blood pressure, heart rate, and ECG should still be monitored. The American College of Sports Medicine or ACSM also has a risk classification that is well researched and useful for the cardiac component of a pre-participation. Many go on to complete a master's program in sports medicine.

EditedbyDrs.Inthecontextofmedicalevaluationsofphysicalperformance conducting a pre-participation screen that identifies an athlete at possible risk, the medical professional must decide whether the athlete is fit to compete.
