One frontline staff and a management engineer described ways in which senior leaders' involvement was critical to moving things along at a faster pace. Another challenge is that in order to be successful, and truly agile, clients have to make themselves available and be empowered to make decisions which is rare in hierarchical, and board orientated organizations and provide ongoing feedback and prioritization on the fly to keep the project moving.

Armin Lohr. The goal of the projects that made up the BedFlow Value Stream was to focus on sharing practical knowledge in the area of Lean Design and Construction. In addition, these managers must install more complex, frequently interlinked, technologies in the project. There were new staff. But where is the value in that? On the Surgeons' Preference Card project, an executive and a management engineer noted how important the IT package was, but that sometimes, the IT software didn't work correctly or didn't fit with other information systems in the hospital. However, frontline staff noted that the process is still in place and working effectively.
