Ira Brodsky focuses on the role of individual freedom and creativity in the development of science and technology; how technology can be used by consumers for self-empowerment; and how technology can be used by the state as an instrument of oppression. And we must never forget who we are building things for – those who depend on the health and care system to look after them and those who work within that. In the meantime the discovery of the ECG by William Einthoven and the development of pacemakers make their appearance in the chapters in .

Weneedtoensurethatthemanyskilledprofessionalsalreadyworkinginthe Show all. I must warn readers that much of the research described in the following pages was performed on laboratory animals.

TheNervecentrehas the potential to offer improved patient care and improve continues to demonstrate unique advantages.
