Configuration and deployment of your system The way IBM is transforming is phenomenal. What excites you the most about your work at IBM?

Total management of all hardware: loans, repair, on-site maintenance, stand. With added use of arrays for maximum flexibility. A lot of that communication has included a plea to bring development and operations closer .

However, the composition of the operation team changes gradually as a secondary consequence of this system is that developers become a bit more diligent about the code they push into production, knowing they have to live with the results.
