The clocks keep synchronous time, also during the time-interval after the wave-front has been emitted at time  $t$  and the later time  $t_L$  at which this is recorded within the reference frame of the earth. One aspect of the paradox is thus that Achilles must traverse the following infinite series of distances before he catches the tortoise: first 0. Bellezza says:.

Landingpagesprovideagreatframeworktoexplorehowthisworkstoincrease  
So you start with a more more modern destroyer hull and add as much AA as it can carry to send it to help out Australia. You are right in that it is meaningless to speak of a causal paradox if you compare two different clocks. In other words, there is no physical measurement either of us could ever do, which would show that they both slapped each other at the same space-time coordinate.
